

MASTER KEY REGISTRATION

Secure your account and unlock new functionality

Registering your Master Key ensures that your organization retains full control over how it is used and who can access the systems it protects. It also allows Tosi to notify the right people in your organization if we detect unusual activity, security risks, or important changes affecting your account.

Please register when prompted.

Registration is a two-step process:

If your organization already uses Tosi Control, you can log in and register your key under your existing account.

If you do not yet have an account, you will need to create one before registering your Master Key.

Why do I need to register my Master Key?

Registering your Master Key ensures that your organization retains full control over how it is used and who can access the systems it protects.

Without registration, there is no way to verify ownership. This means that if access is ever lost, disputed, or needs to be transferred, Tosi has no basis to assist you. Registration creates a trusted record that protects your organization.

It also allows Tosi to notify the right people in your organization if we detect unusual activity, security risks, or important changes affecting your account.

Creating a Tosi Control account and registering your key gives you access to Tosi Control, a platform that gives you real-time visibility into every Tosi gateway.

You do not need new hardware for this new functionality. It is already part of what you own. By creating the account and registering your key, you'll unlock:

- Full visibility with search and filter functionality for your fleet of gateways, all in one pane of glass.

Who needs to register?

Any Master Key that is not yet associated with a Tosi Control account must be registered. If your organization has multiple Master Keys, you should only need to register one of them.

How long does registration take? Most registrations take less than 5 minutes. **You will need:**

- Your Master Key
- Access to email for account verification (if creating a new account)
- Basic organization information

How to register the Master Key

After opening your Master Key, you will be prompted to register your Key.

Click "Register and follow the instructions.

Note: Only one Master/Backup Key per environment needs to be registered. TosiControl automatically receives the information about all other Keys in the same environment. So if the registration popup does not appear, the registration has already been completed with another Master/Backup Key.

After I register, will I have the same access as before?

Yes, registration does not impact your access or functionality.
