

# REACH-Declaration of Conformity

**Company:** Astro Motorengesellschaft mbH & Co. KG

**Product:** Motors, Gearbox motors,  
ASMxxxx; AGMxxxx; AGEMxx; AEMxx; ASxx-x; SAMxx

We have taken all necessary measures to ensure the safe use of our products and to minimize risks to human health and the environment. We have shared all relevant information about the chemical substances in our products with our suppliers and customers. We undertake to continuously meet and review the requirements of the REACH regulation.

Please note that the motors and geared motors that you receive from Astro Motorengesellschaft meet the definition of products. "Article: Object that is given a specific shape, surface or design during manufacture that determines its function to a greater extent than the chemical composition;" (REACH Article 3) A duty to provide safety data sheets for these products under REACH Article 31 ask, therefore does not exist.

In order to ensure hazard communication and hazard prevention even without a safety data sheet, the European Union has restricted or prohibited the placing on the market of the substances listed in Annex XVII of the REACH regulation in accordance with Article 67 to protect the general public.

Substances that are not restricted but are classified as of very high concern according to Article 57 due to their high hazard potential are listed in Annex XIV and are referred to as SVHC (substance of very high concern). These substances are also permitted for products from a concentration of 0.1% notifiable under Article 33.

The manufacturer, downstream user or importer is obliged to provide the recipient with sufficient information for the safe handling of the article, but at least the name of the substance. As a manufacturer and supplier of articles, Astro Motorengesellschaft is aware of the REACH-related requirements for substances in articles, in particular according to Article 33. We monitor the development of the SVHC list very closely and keep information from our suppliers up to date on the absence and presence of SVHCs. It has been agreed with our suppliers that only REACH-compliant products are delivered to us. If the conformity is not maintained, our suppliers are obliged to inform us about this immediately.

Based on our current knowledge and based on the documentation (safety data sheet, technical data sheet, declarations of conformity) from our suppliers for both raw materials and finished products, we can therefore confirm that the products we sell meet the requirements of the REACH regulation EG/1907/2006 (SVHC -list).

Geestland, 26.05.2023
