GOT Screen Design Software MELSOFT GT Works 3+plus

Professional designs.Maximized efficiency.Intuitive operations.All made possible by GT Works3.

Whether the goal is to improve design efficiency, create unique screens, or reuse existing ones, MELSOFT GT Works3 is the perfect solution. It offers ready-to-use sample screens and enables reuse of pre-existing designs to accelerate time-to-market.

Additionally, fully integrated with the GOT screen is connectivity to Mitsubishi FA products as well as other applications. And because everything is designed to operate intuitively, first time users do not have to worry about a learning curve. GT Works3 is truly triggering a revolution in screen design.

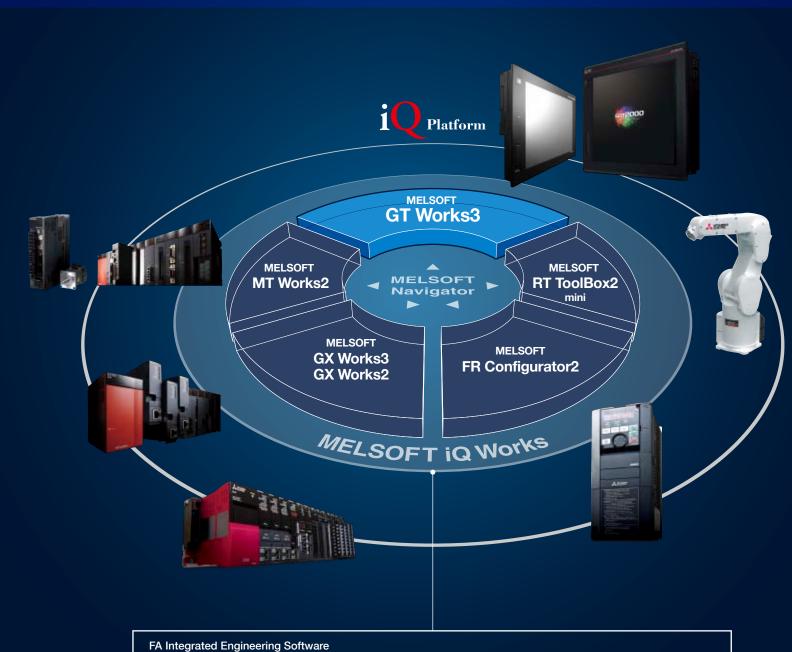

GOT Screen Design Software MELSOFT GT Works3

This integrated software is used to create professional screen designs for GOTs. Developed with the concepts of "Simplicity", "Sleekness", and "User-friendliness" in mind, this is a powerful tool that pushes boundaries and delivers endless design possibilities.

MELSOFT iQ Works

MELSOFT iQ Works is an integrated software suite consisting of GX Works3, GX Works2, MT Works2, GT Works3, RT Toolbox2 mini and FR Configurator2, which are programming software for each respective product. Integration is further enhanced with MELSOFT Navigator as the central system configuration incorporating an easy-to-use, graphical user interface with additional project-sharing features such as system labels and parameters. The advantages of this powerful integrated software suite are that system design is made much easier with a substantial reduction in repetitious tasks, cutting down on errors while helping to reduce the overall TCO.

System Management Software

.....

MELSOFT Navigator

System level graphic-based configuration tool that simplifies the system design by providing a visual representation of the system. System management features such as system-wide parameterization, labels and block reading of project data are also included.

MELSOFT GX Works3

GX Works3 is the latest generation of programming and maintenance software offered by Mitsubishi Electric specifically designed for the MELSEC iQ-R Series control system. It includes many new features such as graphic-based system configuration, integrated motion control setup, multiple language support, providing an intuitive engineering environment solution.

MELSOFT GX Works2

In addition to inheriting program resources created with GX Developer, familiar functions have been refined to provide more intuitive operation and reduce engineering costs.

Motion Controller Engineering Software

MELSOFT MT Works2

This motion control design and maintenance software includes intuitive graphic-based programming together with a digital oscilloscope simulator.

Robot Engineering Software

MELSOFT RT ToolBox2 mini

This robot setup software supports various steps from programming, to commissioning, evaluation, and maintenance. In addition, improved preventative maintenance is realized through the use of an integrated 3D robot simulator.

Inverter Setup Software

MELSOFT FR Configurator2

This software simplifies the setup and maintenance of AC Inverters. Parameters can be registered easily and distributed to multiple inverters when replacing, and activation of the PLC function all from one setup screen.

GOT Screen Design Software MELSOFT GT Works3^{+plus}

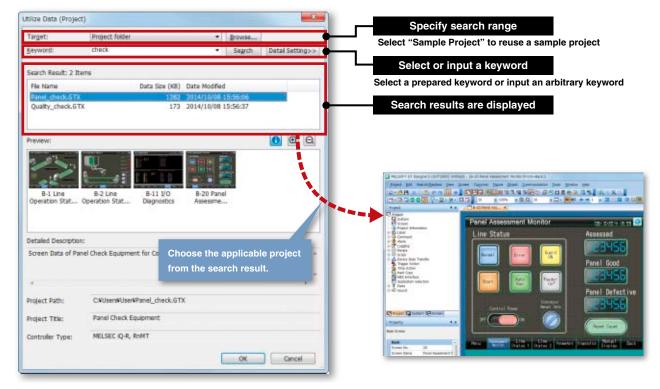

Reuse existing screens to increase efficiency!

Use keywords to search for screens from past projects or provided sample projects. Simply select the applicable data to import and reuse in a new project.

Reuse previous projects

When creating a new project, search through the existing projects to find any existing projects that may be reused. Keyword search helps narrow down the search.

Search target

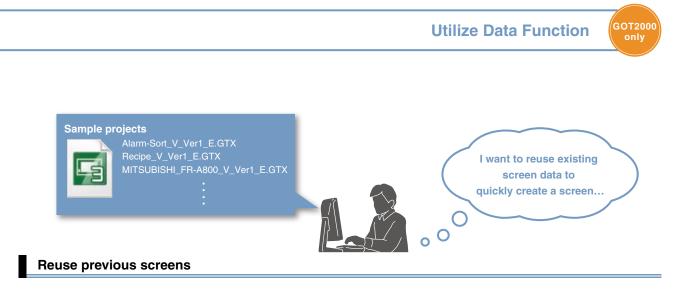

The search range can be designated.

- Sample project ⇒P.12
- Recently edited project
- Project folder (Search folders up to three levels below)
 Always using the same folder to save
- GOT projects will make searches easier.

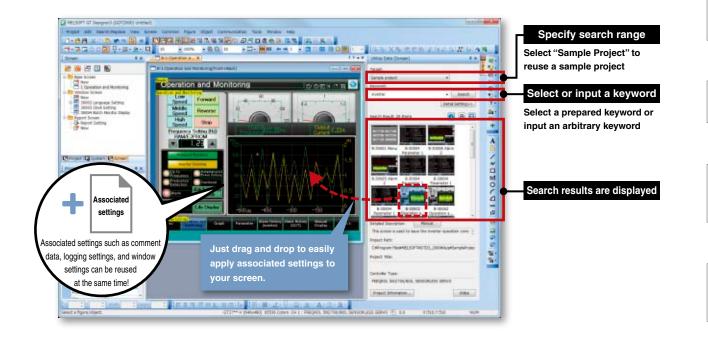

| Target: | Sample project | - | | |
|-----------------|------------------------|-----|--------|------------------|
| Keyword: | Please enter a keyword | • • | Search | Detail Setting<< |
| GOT Type: | GT27**-5 (800x600) | * | | |
| ontroller Type: | MELSEC IQ-R, RnMT | • | | |
| Last Update: | Within the past year | • | | |

Sample projects are available for use with the utilize data function. See page 12 for more information.

GOT Screen Design Software MELSOFT GT Works 3^{+plus}

Reuse individual screens from past or sample projects. The settings, such as comments and logging settings, are also applied and reused.

- ♦ Procedure: [Screen] \Rightarrow [New] \Rightarrow [Utilize Data]
- Shortcut keys:Ctrl + Shift + F

Search keywords

Select a prepared keyword or input an arbitrary keyword to search the data. When utilizing a project, the entered keyword is searched from the file name and project information (project title, detailed description, created by). When creating a project, input character strings and explanations that can be used as keywords in the project information.

When creating a project, input character strings and explanations that can be used as keywords in the project information. This will make subsequent searches easier!

When utilizing a screen, the entered keyword is searched from the file name, screen name, detailed description on screen, object name, figure name and template name.

Refined search

Refine the search by the GOT type, controller type and last update to quickly find the data you want to utilize.

Variety of sample projects available for use with utilize data function

A variety of sample projects are available including standardized projects for frequently used functions, projects for the GOT's various functions, and projects for monitoring connected devices and changing parameters. Easily create project data to match your purpose and application. Sample projects are available in English, Japanese, and Chinese (Simplified).

Standard screen samples: frequently used screens are standardized and grouped into 17 categories by purpose NEW

Check operations with a single click!

Simulator

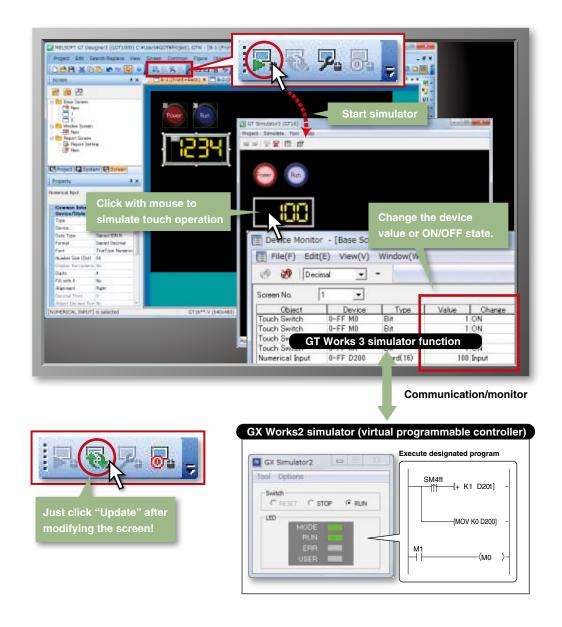

GOT2000 GOT1000

Since the operation of the project data can be confirmed on the personal computer, the program can be efficiently debugged while making changes on the screen.

Even if hardware is not available, the operations can be confirmed with a personal computer and sequence programs.

The screen images can be printed and saved, and easily used when creating specifications and operation manuals.

* GX Works3 (coming soon), GX Works2, GX Simulator, or MT Works2 is required separately. (It varies depending on the CPU to simulate.) * The GOT2000 device monitor is coming soon.

○ Procedures: [Tools] → [Simulator] → [Activate]
 □ Shortcut key: Ctrl + F10

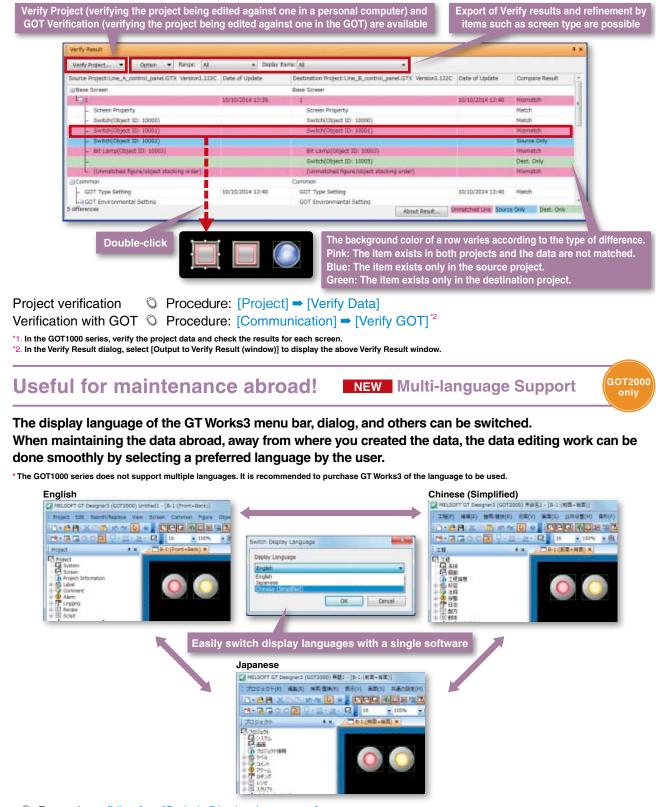

Improving Maintenance Efficiency

View data differences at a glance!

Upgrade Data Verification

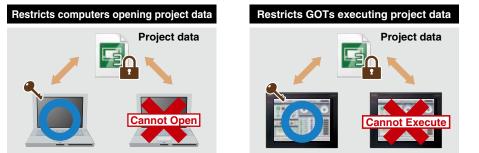

Verify the project data and check the results for each screen/object **NEW**.¹ From the Verify Result window, you can jump to the target object or can narrow down results by items such as the screen type. This function enables you to check differences and modify the data quickly even if the project data includes many screens. **NEW**

Protect your data from being leaked or copied! NEW Security Key Authentication

With the security key authentication function, computers without registered security keys can't open project data. As well, because GOTs without registered security keys can't execute project data, your techniques (know-how) are protected from information leaks.

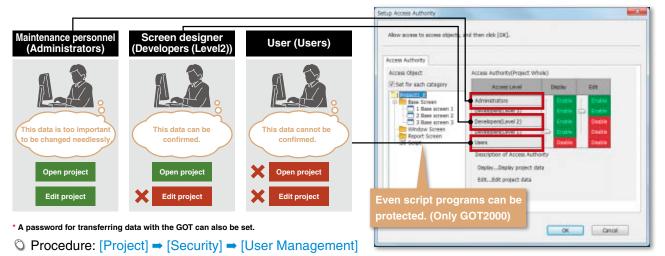

GOT2000 Restrict users to prevent alteration of your data! **User Management** GOT1000

Users having access to project data can be restricted.

Prevent illegal editing of project data by setting access authority (display/edit) for each user. Access authority can be set for each project or each screen.

* Project data having security set with GT Works3 Version 1.45X or later cannot be handled with a version older than GT Works3 Version 1.45X.

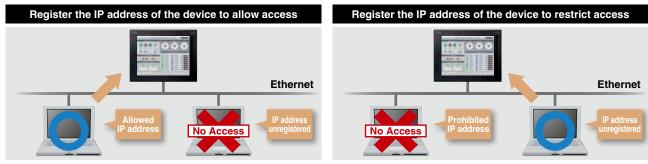

Reduce risk of unauthorized access through networks! **NEW** IP Filter

GOT2000

GOT2000

By registering the IP addresses of devices which can access the GOT or which are prohibited to access the GOT, access from devices without permission can be prevented.

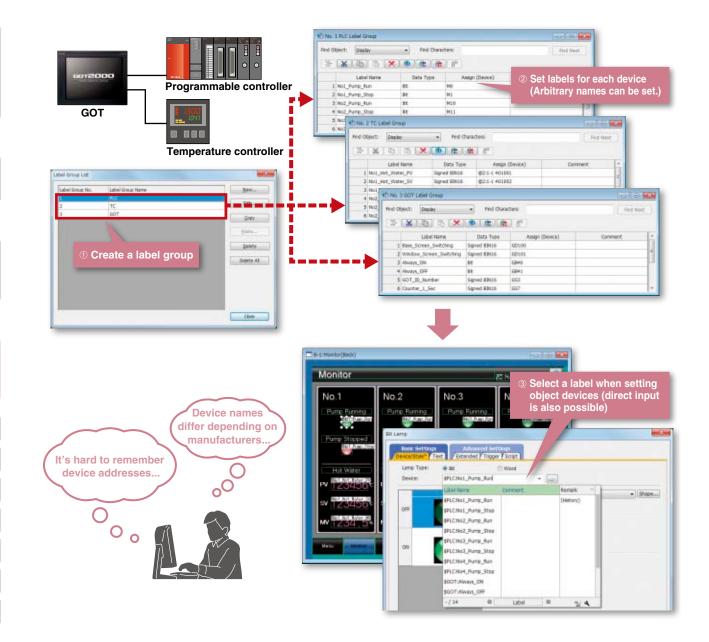

Procedure: [Common] = [Controller Setting] * When using Ethernet connection

Design screens without worrying about actual devices

Instead of using controller devices or GOT internal devices, use easy-to-understand names (label names) to create screens. The users can design screens without worrying about actual devices. Devices assigned to labels can easily be changed so that it is easy to utilize existing screen assets and to standardize projects.

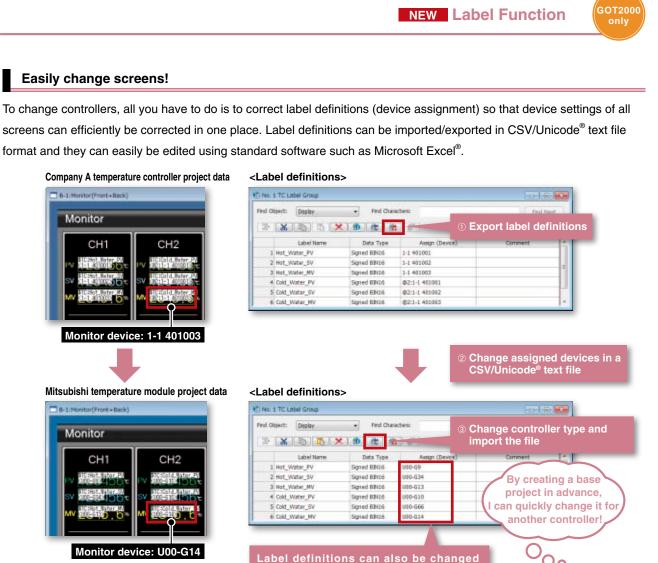

Design screens without worrying about actual devices

Instead of using devices, use easy-to-understand names (label names) to create screens. Not only Mitsubishi programmable controller devices, but also third party controller devices and GOT internal devices can be assigned to labels. The labels can easily be managed by defining label groups for each controller and screen.

Procedure: [Common] = [Label] = [New Label Group]

Label definitions can also be changed directly in the Label Group window. Even if one device is used in multiple screens, the device setting in all screens can be changed by correcting the device assignment in the Label Group window.

Standardizing Projects

Further reduce total costs

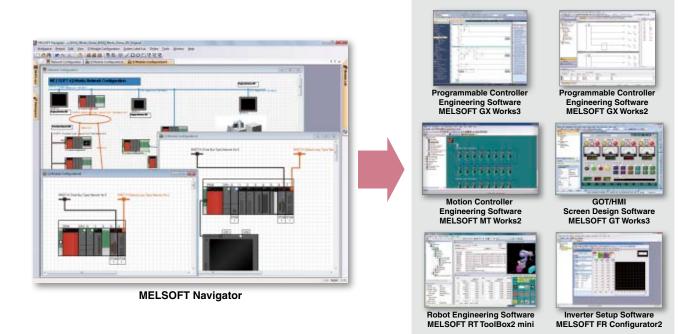

MELSOFT iQ Works

GOT2000 GOT1000

MELSOFT iQ Works suite integrates the engineering software (GX Works3, GX Works2, MT Works2, GT Works3, RT ToolBox2 mini, FR Configurator2). The system designing efficiency and programming efficiency are improved and total costs are reduced by sharing the designing information, including system design and programming, for the entire control system.

MELSOFT Navigator

MELSOFT Navigator, along with GX Works3, GX Works2, MT Works2, GT Works3, RT ToolBox2 mini, and FR Configurator2, facilitates system level design and acts as the interface between each software. Useful functions include design of system configuration, parameter batch setting, system labels, and batch read.

No need to set parameters for each tool

The information set in the system configuration diagram can be applied in a batch to each program in GX Works3, GX Works2, MT Works2, and GT Works3. ^{*1}

There is no more need to start up each software and check the consistency.

*1. Detailed parameters must be set with each tool.

Share labels and automatically change related projects

With MELSOFT Navigator, labels can be shared between the programmable controller, motion controller and GOT. For example, if the device assignment is changed in the programmable controller project, the changes are automatically applied to the motion controller and GOT project.

Mitsubishi FA Integration Concept

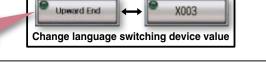

Solution for radically resolving various FA challenges from a point of TCO*... That is "iQ Platform". Advanced technologies are integrated, optimized and innovated to reduce costs in development, production and maintenance.

GOT2000 Utilize labels and device comments **NEW** GX Works3, GX Works2, MT Works2 Interaction only Efficiently design screens by interacting with Programmable Controller Engineering Software GX Works3, GX Works2 and Motion Controller Engineering Software MT Works2. Use GX Works3 and MT Works2 labels when entering a device When you enter a device, GX Works3 global labels and MT Works2 labels* can be specified so you can create screens without sparing a thought for actual device addresses. (When using MELSEC iQ-R Series and motion controllers [MELSEC iQ-R Series] only) * MT Works2 labels will be supported soon. Labels can be set Extended To Switch Action Device! ::StooFig1 0,000 Action Momentary C Alternati C Set O Reset Add Label assignment information auto acquisition When the screen was created by using GX Works3 global labels or MT Works2 labels, the GOT automatically acquires the assignment information. It's unnecessary to correct or transfer the GT Works3 project data even if device assignments are changed. Convenient import function for device comments By importing GX Works3, GX Works2, or MT Works2 device comments, you can enter devices while confirming device comments during screen design, or you can use the device comments for the text of switches and other objects. In addition, device names can also be imported to comment groups so that it is easy to check names of the devices that are assigned to switches and lamps on GOT screens. Import device comments and device names No. 2 Comment List 3 HELSEC IQ-9, Relief OF RE. 1-17 Network Setting: (internet) Japan Column No. Japan 1 Device Comment 2 Device Name CNEX COMMENT OF (DEC) 1 Forward End XD01 Input Amet Diplay Column Comment . 2 Backward End X002 DevConnent 3 Upward End XD03 Check assigned device names on GOT and End 8004 Regater the device comments as a comment group [2] Register the device names as well "The device names will be added to the column No.30 m to

Device comments can be used for the text of switches and other objects

GX Works3 consists of various different components that help to simplify creation and maintenance tasks.

Global variables (labels) are supported providing an easy way to share device names across multiple projects and other MELSOFT software.

Motion Controller Engineering Software

Motion SFC programming, parameter setting, and the digital oscilloscope function, etc. are available. With these various features, this software supports all necessary steps including system configuration, programming, debugging, and maintenance of motion controllers. Variables (labels) are supported providing an easy way to share device names across multiple projects and other MELSOFT software.

Library data and template data for GOT1000 can be imported into the GOT2000's system library. Design new screens for GOT2000 while inheriting the screen images for existing models.

GOT2000 GOT1000 **Data Transfer Tool** Easily transfer data from existing models! Project data can be transferred from a personal computer that does not have the screen design software installed. (The tool is included with GT Works3.) Personal computer not equipped with screen Target GOT design software GOT2000, GOT1000, GOT900, GOT800 6012000 Target data USB¹ / RS-232 / Ethernet² / wireless LAN Package data (GOT2000 only) Send screen data with Project data (GOT1000, GOT900, GOT800 only) data transfer tool Resource data (GOT2000, GOT1000 only) *1. GOT2000 and GOT1000 only *2. GOT2000 and GOT1000 (GT16/GT15/GT14) only Compatible OS Supported by GOT2000 only. Installation of the wireless LAN communication unit (GT25-WLAN) is required on the GOT. *3 Microsoft® Windows® 8.1, Microsoft® Windows® 8, Data transfer in wireless LAN communication may not be as stable as that in cable Microsoft® Windows® 7, Microsoft® Windows Vista®, communication. A packet loss may occur depending on the surrounding environment and the installation location. Be sure to perform a confirmation of Microsoft® Windows® XP operation before using this product. The product with hardware version A can be used only in Japan. The product with hardware version B or later can be used in Japan (Japan Radio Law), the United States (FCC), the EU member states, Switzerland, Norway, Iceland, and Liechtenstein (R&TTE).

Effectively use existing screen assets!

GT Converter2

Convert GOT800 Series project data into GT Works3 compatible data. (Included with GT Works3)

GOT800

GT Works3

Supported screen design software

GOT800 Series screen design software (SW3NIW-A8GOTP) Digital Electronics Corporation screen design software (GP-PRO/PB III Series) * There are some data and functions that cannot be converted.

GOT900 Series screen design software

GT Designer2 Classic

Read, write and edit the GOT900 Series project data.

MELSOFT GT Works3 Version1 (English Version) operating environment

| Item | Description |
|--|---|
| Personal computer | Personal computer that Windows [®] runs on. |
| OS (English, Simplified Chinese, Traditional Chinese, Korean, or German version) | Microsoft® Windows® 8.1 (Enterprise, Pro) (64 bit/32 bit) ^{11/2/4/5/6} Microsoft® Windows® 8.1 (64 bit/32 bit) ^{11/2/4/5/6} Microsoft® Windows® 8 (64 bit/32 bit) ^{11/2/4/5/6} Microsoft® Windows® 8 (64 bit/32 bit) ^{11/2/4/5} Microsoft® Windows® 7 (Ultimate, Enterprise, Professional) (64 bit/32 bit) ^{11/2/3/4} Microsoft® Windows® 7 (Home Premium) (64 bit/32 bit) ^{11/2/4/5/6} Microsoft® Windows® 7 (Starter) (32 bit) ^{11/2/4/5} Microsoft® Windows Vista® (Ultimate, Enterprise, Business, Home Premium, Home Basic) (32 bit) Service Pack1 or later ^{11/2} Microsoft® Windows® XP (Professional, Home Edition) (32 bit) Service Pack3 or later ^{11/2} |
| CPU | 1GHz or faster recommended |
| Memory | For Windows [®] 8.1 (64 bit), Windows [®] 8 (64 bit), Windows [®] 7 (64 bit): 2GB or more recommended For Windows [®] 8.1 (32 bit), Windows [®] 8 (32 bit), Windows [®] 7 (32 bit), Windows Vista [®] (32 bit): 1GB or more recommended For Windows [®] XP: 512MB or more recommended |
| Display | Resolution XGA (1024 × 768 dots) or higher |
| Hard disk space | For installation: 2GB or more recommended For execution: 512MB or more recommended |
| Display color | High Color (16 bit) or higher |
| Other hardware | Use the hardware compatible with the above OS. For installation: mouse, keyboard, DVD-ROM drive For execution: mouse, keyboard For printing: printer Use the following hardware when required. For simulation (only when outputting the buzzer sound): sound card, speaker |
| Compatible GOT | GOT2000 series, GOT1000 series |
| Applicable software version | GT Works3 Version1.122C or later |

For installation, the administrator authority is required. For Windows[®] 8.1, Windows[®] 8, Windows[®] 7 and Windows Vista[®], the standard user or administrator account is required. To interact GT Designer3 with other MELSOFT applications which are used under the administrator authority, use GT Designer3 under the administrator authority.

2 The following functions are not supported.
Application start in Windows compatibility mode • Fast user switching • Change your desktop themes (fonts) • Remote desktop
• DPI setting other than the normal size (For Windows[®] XP and Windows Vista[®])
• Setting the size of text and illustrations on the screen to any size other than [Small-100%] (For Windows[®] 8.1, Windows[®] 8, and Windows[®] 7)
• Windows Touch or Touch is not supported.

*5 Modern UI Style is not supported.
*6 Hyper-V is not supported.

MELSEC-F Serie

All-in-One Micro Programmable Controller equipped with all necessary functions in a compact body ©Supporting small-scale control from 10 points to 384 points (using CC-Link) with an outstanding cost performance.

○Wide range of options available for additional functions required by your system.

Easy to use and highly reliable. More than 12 million units have shipped worldwide. (April 2013)
 Small-scale control is available in various networks such as CC-Link, Ethernet, and MODBUS.

| Product specifications | |
|------------------------------------|--|
| Program capacity | 16k steps (FX _{3s}) to 64 k steps (FX _{3U} /FX _{3UC}) |
| Number of input/output points | 10 points (FX _{3s}) to 384 points (FX _{3U} /FX _{3Uc} with CC-Link) |
| Basic instruction processing speed | 0.21µs (FX3s) to 65 ns (FX3u/FX3uc) |
| External connection interface | RS-422, USB (FX3s/FX3g/FX3gc/FX3gc only), Ethernet (FX3ge only), CC-Link/LT (FX3uc-32MT-LT(-2) only) |
| Built-in functions | I/O, high-speed counter input, positioning pulse output, analog (FX30E only) |
| Extended functions | I/O, analog, temperature control, high-speed counter, positioning, network |
| Unit expansion style | Backplane-less design |
| Network | Ethernet, CC-Link, CC-Link/LT, SSCNETIII, CANopen, J1939, RS-232C, RS-422, RS-485, MODBUS |

PLC

AC Servo

Industry-leading level of high performance servo

◎Industry-leading level of basic performance: Speed frequency response (2.5kHz), 4,000,000 (4,194,304p/rev) encoder ◎Advanced one-touch tuning function achieves the one-touch adjustment of advanced vibration suppression control II, etc. ©Equipped with large capacity drive recorder and machine diagnosis function for easy maintenance. \odot 2-axis and 3-axis servo amplifiers are available for energy-conservative, space-saving, and low-cost machines.

| Product Specifications | |
|-----------------------------|--|
| Power supply specifications | 1-phase/3-phase 200V AC, 1-phase 100V AC, 3-phase 400V AC |
| Command interface | SSCNET III/H, SSCNET III (compatible in J3 compatibility mode), CC-Link IE Field Network interface with Motion, pulse train, analog |
| Control mode | Position/Speed/Torque/Positioning function/Fully closed loop |
| Speed frequency response | 2.5kHz |
| Tuning function | Advanced one-touch tuning, advanced vibration suppression control II, robust filter, etc. |
| Functional safety | Conforms to functions of IEC/EN 61800-5-2, STO: Category 3 PL d, SIL 2 Conforms to Category 4 PL e, SIL 3 by a combination with MR-D30 functional safety unit |
| Compatible servo motor | Rotary servo motor (rated output: 0.05 to 55kW), linear servo motor (continuous thrust 50 to 3000N), direct drive motor (rated torque: 2 to 240N • m) |
| | |

FR-A800 Series

D I I O IG II

High-functionality, high-performance inverter

©Realize even higher responsiveness during real sensor-less vector control or vector control, and achieve faster operating frequencies. ◎The latest automatic tuning function supports various induction motors and also sensor-less PM motors. ◎The standard model is compatible with EU Safety Standards STO (PLd, SIL2). Add options to support higher level safety standards. OControl and monitor inverters via CC-Link/CC-Link IE Field Network (option interface).

| Product Specifications | |
|--|--|
| Inverter capacity | 200V class: 0.4kW to 90kW, 400V class: 0.4kW to 500kW |
| Control method | High-carrier frequency PWM control (Select from V/F, advanced magnetic flux vector, real sensorless vector or PM sensorless vector control), vector control (when using options) |
| Output frequency range | 0.2 to 590Hz (upper limit is 400Hz when using advanced magnetic flux vector control, real sensorless vector control, vector control or PM sensorless vector control) |
| Regenerative braking torque (Maximum allowable duty) | 200V class: 0.4K to 1.5K (150% at 3%ED) 2.2K/3.7K (100% at 3%ED) 5.5K/7.5K (100% at 2%ED) 11K to 55K (20% continuous) 75K or more (10% continuous), 400V class: 0.4K to 7.5K (100% at 2%ED) 11K to 55K (20% continuous) 75K or more (10% continuous) |
| Starting torque | 200% 0.3Hz (3.7K or less), 150% 0.3Hz (5.5K or more) (when using real sensorless vector, vector control) |

GOOD DESIGN AWARD 2014

High speed, high precision and high reliability industrial robot

©Compact body and slim arm design, allowing operating area to be expanded and load capacity increased. ◎The fastest in its class using high performance motors and unique driver control technology.

OImproved flexibility for robot layout design considerations.

Optimal motor control tuning set automatically based on operating position, posture, and load conditions.

| Product Specifications | |
|------------------------|---|
| Degrees of freedom | Vertical:6 Horizontal:4 |
| Installation | Vertical:Floor-mount, ceiling mount, wall mount (Range of motion for J1 is limited) Horizontal:Floor-mount |
| Maximum load capacity | Vertical:2-20kg Horizontal:3-20kg |
| Maximum reach radius | Vertical:504-1503mm Horizontal:350-1,000mm |

FAQ

Inquiry

Q Where should we contact if we are interested in purchasing the software or need technical information?

A Please contact your local sales office for any inquiries about the product.

Products

- Q We are currently using the GOT1000 Series screen design software GT Works3. Do we need to purchase new screen design software to design screen data for the GOT2000 Series?
- A The GOT2000 Series screen data can be designed with GT Works3 Version 1.100E or later. If your version of GT Works3 is older than Version1.100E, there is no need to purchase the new version. For more details, please contact your local sales office.

Q What language is available?

A GT Works3 is available in English, Japanese, and Chinese.

Q Can the GOT1000 Series screen data be used with the GOT2000 Series?

A The GOT1000 Series screen data can be used with the GOT2000 Series just by changing the GOT type.

- **Q** Can the GOT2000 Series screen data be used with the GOT1000 Series?
- A The GOT2000 Series screen data cannot be converted into the GOT1000 Series screen data, and thus cannot be used with the GOT1000 Series.

Precautions before use

This publication explains the typical features and functions of the products herein and does not provide restrictions or other information related to usage and module combinations. Before using the products, always read the product user manuals. Mitsubishi Electric will not be held liable for damage caused by factors found not to be the cause of Mitsubishi Electric; opportunity loss or lost profits caused by faults in Mitsubishi Electric products; damage, secondary damage, or accident compensation, whether foreseeable or not, caused by special factors; damage to products other than Mitsubishi Electric products; or any other duties.

🚹 For safe use

- To use the products given in this publication properly, always read the relevant manuals before beginning operation.
- The products have been manufactured as general-purpose parts for general industries, and are not designed or manufactured to be incorporated in a device or system used in purposes related to human life.
- Before using the products for special purposes such as nuclear power, electric power, aerospace, medicine or passenger-carrying vehicles, consult with Mitsubishi Electric.
- The products have been manufactured under strict quality control. However, when
 installing the products where major accidents or losses could occur if the products
 fail, install appropriate backup or fail-safe functions in the system.
