

GT16 Video/RGB Input Unit User's Manual

GT16M-V4 GT16M-V4R1 GT16M-R2

Thank you for purchasing the GOT1000 Series.

Prior to use, please read both this manual and detailed manual thoroughly to fully understand the product.

MODEL	GT16M-V4R1-U
MODEL CODE	1D7M85
ID(NA) 0000421 C(1610)MEE	

●SAFETY PRECAUTIONS●

(Always read these precautions before using this equipment.)

Before using this product, please read this manual and the relevant manuals introduced in this manual carefully and pay full attention to safety to handle the product correctly.

The precautions given in this manual are concerned with this prod-In this manual, the safety precautions are ranked as "WARNING"

and "CAUTION".

Indicates that incorrect handling may cause ⚠ WARNING hazardous conditions, resulting in death or severe injury.

Indicates that incorrect handling may cause Macates that incorrect handling may cause hazardous conditions, resulting in medium or slight personal injury or physical damage.

Note that the extstyle extstyleaccording to the circumstances.

Always follow the precautions of both levels because they are important to personal safety.

save this manual to make it accessible when required and always forward it to the end user

IDESIGN PRECAUTIONS

⚠ CAUTION

Do not bunch the control wires or communication cables with the main circuit or power wires, or lay them close to each other As a guide, separate the lines by a distance of at least 100mm (3.94 inches) otherwise malfunctions may occur due to noise.

[INSTALLATION PRECAUTIONS]

⚠ WARNING

- Be sure to shut off all phases of the external power supply used by the system before mounting or removing this unit to/from the GOT. Not doing so can cause a unit failure or malfunction.
- Before connecting the Bus connection cable to this unit, always shut off GOT power and PLC CPU power externally in all phases.Not doing so can cause a malfunction.

⚠ CAUTION

- Use this unit in the environment that satisfies the general Use this unit in the environment that satisfies the general specifications described in the User's Manual for the GOT used. Not doing so can cause an electric shock, fire, malfunction or product damage or deterioration. Do not drop the unit or subject it to string shock. A unit damage may result.

 When installing this unit to the GOT, fit it to the connection interface of the GOT and tighten the mounting screws in the
- interface of the GOT and tighten the mounting screws in the
 - specified torque range.

 Undertightening can cause a drop, failure or malfunction.

 Overtightening can cause a drop, failure or malfunction due to screw or unit damage.

[WIRING PRECAUTIONS]

⚠ WARNING

 Be sure to shut off all phases of the external power supply used by the system before wiring.
 Failure to do so may result in an electric shock, product damage or malfunctions.

⚠ CAUTION

- Exercise care to avoid foreign matter such as chips and wire offcuts entering the unit.

 Not doing so can cause a fire, failure or malfunction.
- Make sure to securely connect the cable to the connector of Incorrect connection may cause malfunctions.

[STARTUP AND MAINTENANCE PRECAUTIONS]

⚠ WARNING

- Before starting cleaning, always shut off GOT power externally in all phases
- Not doing so can cause a unit failure or malfunction.
 Undertightening can cause the GOT to drop, short circuit or malfunction.
- Overtightening can cause a short circuit or malfunction due to
- Overtigneeining can cause a short circuit or mairunction due to the damage of the screws or unit.

 Do not disassemble or modify any unit.

 This will cause failure, malfunction, injuries, or fire.

 Do not touch the conductive areas and electronic parts of this unit directly.
- Doing so can cause a unit malfunction or failure.

⚠ CAUTION

- Always secure the cables connected to the unit, e.g. run them in conduits or clamp them. Not doing so can cause unit or cable damage due to dangling, moved or accidentally pulled cables or can cause a malfunction due to a cable contact fault.

 Do not hold the cable part when unplugging any cable
- connected to the unit. Doing so can cause unit or cable damage or a malfunction due to a cable contact fault.

$oldsymbol{\Delta}$ CAUTION

Always make sure to touch the grounded metal to discharge the electricity charged in the body, etc., before touching the uni Failure to do so may cause a failure or malfunctions of the unit.

[DISPOSAL PRECAUTIONS]

↑ CAUTION

Dispose of this product as industrial waste

[TRANSPORTATION PRECAUTIONS]

⚠ CAUTION

Make sure to transport the GOT main unit and/or relevant unit(s in the manner they will not be exposed to the impact exceeding the impact resistance described in the general specifications of the User's Manual for the GOT used, as they are precision devices.
Failure to do so may cause the unit to fail.
Check if the unit operates correctly after transportation.

Precaution for using the unit with the function

The extended function OS (Video/RGB) installed in GT Works3 with less than Version 1.73B cannot recognize the unit with the function version B or later, thus the unit is not properly operated. When using the unit with the function version B or later, use the extended function OS (Video/RGB) with version 05.59.00 or later under GT Works3 Version 1.73B or later.

1. OVERVIEW

This User's Manual describes the following units.

When mounting the following units with the GT16□□M, the GOT can display video images taken by a camcorder or a RGB screen. • For the GT16M-V4 video input unit (hereinafter referred to as the video input unit), the GOT can display video images taken by up to

For the GT16M-V4R1 video/RGB input unit (hereinafter referred to as the video/RGB input unit), the GOT can display video images taken by up to four camcorders or a RGB screen for up to one device for the RGB input.

• For the GT16M-R2 RGB input unit (hereinafter referred to as the

RGB input unit), the GOT can display only one RGB screen by switching up to two video input channels.

For the video input with using the above units, the GOT can be used

as a vision sensor monitor. For the RGB input unit with using the above units, the units can be used as the RGB output type vision sensor.

- *1:Power on the GOT simultaneously with the camcorder.
- *2:Depending on the camcorder type, noise from the power supply cable of the camcorder may cause malfunction of the GOT or a programmable controller.
- In this case, attach the following line filter to the power supply line of Recommended line filter: TDK ZHC2203-11 (or equivalent products)
- *3:When connecting any of the above units to a personal computer, ground the ground cable of the personal computer. To use the video input unit, video/RGB input unit, and RGB input unit

set the communication settings. For the settings and system configurations, refer to GOT1000 Series Connection Manual

For video input and RGB input functions, refer to GT Designer2 Version⊡ Screen Design Manual.

2. SPECIFICATIONS

The performance specifications of the video input unit, video/RGB input unit, and RGB input unit are indicated below

The general specifications of the video input unit, video/RGB input unit, and RGB input unit are the same as those of the GOT. Refer to the User's Manual for the GOT used for the general specifications of the GOT.

5)	Board fixing screw	Screw for fixing the extension interface relay board
6)	Mounting screw	Screw for fixing the unit
7)	Rating plate	-

3.2 Extension Interface Relay Board

Unit: mm (inch)

4. INSTALLATION PROCEDURE

The installation procedure for the video/RGB input unit is explained using the GT1575

- 1) Turn off the GOT.
- 2) Remove two extension unit covers of the GOT

- 3) Connect the extension interface relay board to the extend interface2 side on the GOT.
- Remove the connector cover from the board
- 4)The connector for video input has the protection cap. Remove the protection cap for the connector to be used (Store the removed protection cap.)
- 5) Fit the video/RGB input unit in the GOT case.

- 6) Tighten four mounting screws with a torque of 0.36 to 0.48N•m to
- 7) Tighten two board fixing screws with a torque of 0.36 to 0.48 N·m

8) For mounting any extension unit on the unit, remove the connector cover and the stickers.

For mounting no extension unit on the unit, cover over four mounting screws with the accessory stickers to avoid static electricity

Keep the connector cover fixed Keep all the stickers fixed.

Point

Remove the screws that fixes the extension interface relay board before removing the unit.(Above 7))

Warranty

Mitsubishi will not be held liable for damage caused by factors found not to be the cause of Mitsubishi; machine damage or lost profits caused by faults in the Mitsubishi products; damage, secondary damage, accident compensation caused by special factors unpredictable by Mitsubishi; damages to products other than Mitsubishi products; and to other duties.

⚠ For safe use

- This product has been manufactured as a general-purpose part for general industries, and has not been designed or manufactured to be incorporated in a device or system used in purposes related to
- Before using the product for special purposes such as nuclear power, electric power, aerospace, medicine or passenger movement vehicles, consult with Mitsubishi.

 This product has been manufactured under strict quality control.
- However, when installing the product where major accidents or losses could occur if the product fails, install appropriate backup or failsafe functions in the system.
