

FR-F800-E – FANS PUMPS COMPRESSORS

Special frequency inverter for ventilation applications in building automation and industrial plants

- Simple commissioning
- Energy efficiency
- Reliability
- Predictive maintenance

Solution

- Special functions for ventilation fans integrated in the frequency inverter:
 - Cleaning function
 - Cascade control
 - Fire mode function
 - 2 PID control loops
 - Belt monitoring
- Simple commissioning, high functionality, and long service life for fans
- Integral PLC in the inverter
- Integrated safety functions (STO)
- Smart Condition Monitoring matched to our FR-F800-E, with clear text display for predictive maintenance and shutdown planning
- With integral interference filter
- Including PTC thermistor evaluation

With every first purchase of a FR-A800-E, one LU08 plain text display per customer is delivered free.*

The LU08 is a plain text display for the A800 and F800 frequency inverters. Thanks to its convenient operation, it permits simple commissioning. The integral "Digital Dial" of the operating unit gives the user direct access to all important parameters and to pre-configured functions such as the Easy Setup. The panel provides full text displays in up to 15 languages, plus a real-time clock.

* When ordering, please indicate "LU08 campaign". This offer is valid until 31.12.2018

FR-F800-E – Fans Pumps Compressors

Added value

- Ventilator fan and capacitors designed for at least 10 years of service
- Top quality with a standard 3-year warranty starting from date of production
- More than 300 functional tests during production
- Intelligent maintenance functions such as maintenance timer and tests of capacitor/ventilator
- FR Configurator commissioning tool complete with programming software for the integral PLC in the frequency inverter can be downloaded free from MyMitsubishi
- In-house semiconductor development and production
